Project Title

VENDORCONNECT, A HYBRID PHYSICAL – DIGITAL SOLUTION

Problem Statement

Street vendors often struggle to access affordable infrastructure, basic services, digital payment tools, and clear legal protection, which limits their income, safety, and growth opportunities. They frequently operate in crowded areas with little shelter, face sudden evictions, lack storage, credit, insurance, and connectivity, and remain excluded from formal systems. With better support, fair rules, training, and simple digital tools, vendors can raise earnings, improve safety, and build stable livelihoods while serving their communities and cities.

Project Team

TEAM 4 - VENDORS CARE TEAM
